

# Dandy's day at the dentist

Dandy arrives at the hospital between 7 and 8 a.m. having not been fed after midnight. He'll be undergoing anesthesia for his dental procedure today.

He's not happy about missing breakfast, but he will be so happy when we make his smile shine. We'll perform a complete physical examination and obtain samples to run tests that will alert us to any health concerns.

Dandy's test results show he is A-OK for the procedure. It's now time to anesthetize him.

Dandy can sleep now while we do all the work. First we take dental X-rays and perform a close examination of Dandy's teeth and mouth.

Dandy then has his teeth thoroughly cleaned and polished. He recovers quickly from anesthesia while a veterinary nurse monitors his progress and keeps him comfortable until his owner arrives.

Before Dandy goes home, the technician reviews care instructions with Dandy's owner to ensure Dandy does well at home.
